Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Trading Symbol(s)	Name of each exchange on which registered
Common Stock, par value \$0.0001	BNTC	The Nasdaq Stock Market LLC

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes  No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes  No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, anon-accelerated filer, smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer	<input type="checkbox"/>	Accelerated filer	<input type="checkbox"/>
Non-accelerated filer	<input checked="" type="checkbox"/>	Smaller reporting company	<input checked="" type="checkbox"/>
Emerging growth company	<input type="checkbox"/>		

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes  or No

We had 8,171,690 shares of our common stock outstanding as of the close of business on November 15, 2021.

## SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

This Report contains forward-looking statements that are subject to a number of risks and uncertainties, many of which are beyond our control. Our forward-looking statements relate to future events or our future performance and include, but are not limited to, statements concerning our business strategy, future commercial revenues, market growth, capital requirements, new product introductions, expansion plans and the adequacy of our funding. All statements, other than statements of historical fact included in this Report, are forward-looking statements. When used in this Report, the words “could,” “believe,” “anticipate,” “intend,” “estimate,” “expect,” “may,” “continue,” “predict,” “potential,” “project,” or the negative of these terms, and similar expressions are intended to identify forward-looking statements, although not all forward-looking statements contain such identifying words. These statements involve known and unknown risks, uncertainties and other important factors that may cause our actual results, levels of activity, performance or achievements to be materially different from the information expressed or implied by these forward-looking statements.

Some of the risks and uncertainties that may cause our actual results, performance or achievements to differ materially from those expressed or implied by forward-looking statements include the following:

- the success of our plans to develop and potentially commercialize our product candidates;
- the timing of the initiation and completion of preclinical studies and clinical trials;
- the timing and sufficiency of patient enrollment and dosing in any future clinical trials;
- the timing of the availability of data from clinical trials;
- the timing and outcome of regulatory filings and approvals;
- unanticipated delays;
- sales, marketing, manufacturing and distribution requirements;
- market competition and the acceptance of our products in the marketplace;
- regulatory developments in the United States of America;
- the development of novel AAV vectors;
- the plans of licensees of our technology;
- the clinical utility and potential attributes and benefits of ddRNAi and our product candidates, including the potential duration of treatment effects and the potential for a “one shot” cure;
- our dependence on our relationships with collaborators and other third parties;
- expenses, ongoing losses, future revenue, capital needs and needs for additional financing, and our ability to access additional financing given market conditions and other factors, including our capital structure;
- the length of time over which we expect our cash and cash equivalents to be sufficient to execute on our business plan;
- our intellectual property position and the duration of our patent portfolio;
- the impact of local, regional, and national and international economic conditions and events; and
- the impact of the current COVID-19 pandemic, the disease caused by the SARS-CoV-2 virus, which may adversely impact our business and preclinical and future clinical trials;

as well as other risks detailed under the caption “Risk Factors” in this Report and in other reports filed with the SEC. Although we believe that we have a reasonable basis for each forward-looking statement contained in this Report, we caution you that these statements are based on a combination of facts and important factors currently known by us and our expectations of the future, about which we cannot be certain.

---

[Table of Contents](#)

We have based the forward-looking statements included in this Report on information available to us on the date of this Report or on the date thereof. Except as required by law we undertake no obligation to revise or update any forward-looking statements, whether as a result of new information, future events or otherwise. You are advised to consult any additional disclosures that we may make directly to you or through reports that we, in the future, may file with the SEC, including annual reports on Form 10-K, quarterly reports on Form 10-Q and current reports on Form 8-K.

All forward-looking statements included herein or in documents incorporated herein by reference are expressly qualified in their entirety by the cautionary statements contained or referred to elsewhere in this Report.

**BENITEC BIOPHARMA INC.**  
**Notes to Consolidated Financial Statements**  
**(Unaudited)**

**1. Business**

Benitec Biopharma Inc. (the “Company”) is a corporation formed under the laws of Delaware, United States of America, on November 22, 2019 and listed on the Nasdaq Capital Market (“Nasdaq”) under the symbol “BNTC”. Benitec Biopharma Inc. is the parent entity of a number of subsidiaries including the previous parent entity Benitec Biopharma Limited (“BBL”). BBL was incorporated under the laws of Australia in 1995 and was listed on the Australian Securities Exchange, or ASX, from 1997 until April 15, 2020. On August 14, 2020, BBL reorganized as a Proprietary Limited company and changed its name to Benitec Biopharma Proprietary Limited. The Company’s business focuses on the development of novel genetic medicines. Our proprietary platform, called DNA-directed RNA interference, or ddRNAi, combines RNA interference, or RNAi, with gene therapy to create medicines that facilitate sustained silencing of disease-causing genes.

During the year ended June 30, 2021, the Company completed an organization restructuring as part of the commercial desire to provide a more efficient structure for the future as the Company continues to transition its operations to the US.

The Company’s fiscal year end is June 30. References to a particular “fiscal year” are to our fiscal year end June 30 of that calendar year.

The consolidated financial statements of Benitec Biopharma Inc. are presented in United States dollars and consist of Benitec Biopharma Inc. and its wholly owned subsidiaries:

	<i>Principal place of business/country of incorporation</i>
<i>Benitec Biopharma Proprietary Limited (“BBL”)</i>	Australia
<i>Benitec Australia Proprietary Limited</i>	Australia
<i>Benitec Limited</i>	United Kingdom
<i>Benitec, Inc.</i>	USA
<i>Benitec LLC</i>	USA
<i>RNAi Therapeutics, Inc.</i>	USA
<i>Tacere Therapeutics, Inc.</i>	USA
<i>Benitec IP Holdings, Inc.</i>	USA

**BENITEC BIOPHARMA INC.**  
**Notes to Consolidated Financial Statements**  
**(Unaudited)**

**2. Basis of Presentation and Summary of Significant Accounting Policies**

***Basis of Presentation***

The Company's consolidated financial statements contained in this Quarterly Report on Form 10-Q have been prepared in accordance with generally accepted accounting principles in the U.S. ("GAAP") for interim financial information and with the instructions to Form 10-Q and Article 8 of U.S. Securities and Exchange Commission ("SEC") Regulation S-X. Accordingly, certain information and disclosures required by GAAP for annual financial statements have been omitted. In the opinion of management, all adjustments, consisting of normal recurring adjustments, considered necessary for a fair presentation have been included. Interim financial results are not necessarily indicative of results anticipated for the full year. These consolidated financial statements should be read in conjunction with the Company's audited financial statements and accompanying notes included in the Company's Annual Report on Form 10-K for the year ended June 30, 2021.

Reference is frequently made herein to the Financial Accounting Standards Board (the "FASB") Accounting Standards Codification ("ASC"). This is the source of authoritative US GAAP recognized by the FASB to be applied to non-governmental entities.

***Principles of Consolidation***

The consolidated financial statements include the Company's accounts and the accounts of its wholly-owned subsidiaries. All intercompany transactions and balances have been eliminated.

***Use of Estimates***

The preparation of the Company's consolidated financial statements requires management to make estimates and assumptions that impact the reported amounts of assets, liabilities and expenses and the disclosure of contingent assets and liabilities in the Company's consolidated financial statements and accompanying notes. The most significant estimates and assumptions in the Company's consolidated financial statements include the estimates of useful lives of property and equipment, valuation of the operating lease liability and related right-of-use asset, allowance for uncollectable receivables, valuation of equity based instruments issued for other than cash, the valuation allowance on deferred tax assets and foreign currency translation due to certain average exchange rates applied in lieu of spot rates on transaction dates. These estimates and assumptions are based on current facts, historical experience and various other factors believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities and the recording of expenses that are not readily apparent from other sources. Actual results may differ materially and adversely from these estimates. To the extent there are material differences between the estimates and actual results, the Company's future results of operations will be affected.

**BENITEC BIOPHARMA INC.**  
**Notes to Consolidated Financial Statements**  
**(Unaudited)**

***Risks and Uncertainties***

The Company is subject to risks and uncertainties common to early-stage companies in the biotechnology industry, including, but not limited to, development by competitors of new technological innovations, protection of proprietary technology, dependence on key personnel, reliance on single-source vendors and collaborators, availability of raw materials, patentability of the Company's products and processes and clinical efficacy and safety of the Company's products under development, compliance with government regulations and the need to obtain additional financing to fund operations.

There can be no assurance that the Company's research and development will be successfully completed, that adequate protection for the Company's intellectual property will be obtained or maintained, that any products developed will obtain necessary government regulatory approval or that any approved products will be commercially viable. Even if the Company's product development efforts are successful, it is uncertain when, if ever, the Company will generate revenue from product sales. The Company operates in an environment of rapid technological change and substantial competition from other pharmaceutical and biotechnology companies. In addition, the Company is dependent upon the services of its employees, consultants and other third parties.

Moreover, the current COVID-19 pandemic, which is impacting worldwide economic activity, poses risks that the Company or its employees, contractors, suppliers, and other partners may be prevented or inhibited from conducting business activities for an indefinite period of time which may delay the start-up and conduct of the Company's clinical trials, and negatively impact manufacturing and testing activities performed by third parties. Any significant delays may impact the use and sufficiency of the Company's existing cash reserves, and the Company may be required to raise additional capital earlier than it had previously planned. The Company may be unable to raise additional capital if and when needed, which may result in delays or suspension of its development plans. The extent to which the pandemic will impact the Company's business will depend on future developments that are highly uncertain and cannot be predicted at this time.

***Segment Reporting***

Operating segments are identified as components of an enterprise about which separate discrete financial information is available for evaluation by the chief operating decision-maker in making decisions regarding resource allocation and assessing performance. The Company views its operations and manages its business in one operating segment.

***Foreign Currency Translation and Other Comprehensive Income (Loss)***

The Company's functional currency and reporting currency is the United States dollar. BBL's functional currency is the Australian dollar (AUD). Assets and liabilities are translated at the exchange rate in effect at the balance sheet date. Revenues and expenses are translated at the average rate of exchange prevailing during the reporting period. Equity transactions are translated at each historical transaction date spot rate. Translation adjustments arising from the use of different exchange rates from period to period are included as a component of stockholders' equity as "Accumulated other comprehensive loss." Gains and losses resulting from foreign currency translation are included in the consolidated statements of operations and comprehensive loss as other comprehensive income (loss).

Other comprehensive income for all periods presented includes only foreign currency translation gains.

**BENITEC BIOPHARMA INC.**  
**Notes to Consolidated Financial Statements**  
**(Unaudited)**

***Fair Value Measurements***

The Company measures its financial assets and liabilities in accordance with US GAAP using ASC 820 *Fair Value Measurements*. For certain financial instruments, including cash and cash equivalents, accounts receivable, and accounts payable, the carrying amounts approximate fair value due to their short maturities.

The Company follows accounting guidance for financial assets and liabilities. ASC 820 defines fair value, provides guidance for measuring fair value and requires certain disclosures. The guidance utilizes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into three broad levels. The following is a brief description of those three levels:

- Level 1: Observable inputs such as quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: Inputs, other than quoted prices that are observable, either directly or indirectly. These include quoted prices for similar assets or liabilities in active markets and quoted prices for identical or similar assets or liabilities in markets that are not active.
- Level 3: Unobservable inputs in which little or no market data exists, therefore developed using estimates and assumptions developed by us, which reflect those that a market participant would use.

As of September 30, 2021, and June 30, 2021, the Company had no financial assets or liabilities measured at fair value on a recurring basis.

***Cash and Cash Equivalents***

Cash and cash equivalents include cash on hand and at banks, short-term deposits with an original maturity of three months or less with financial institutions, and bank overdrafts. Bank overdrafts are reflected as a current liability on the consolidated balance sheets.

***Concentrations of Risk***

Financial instruments that potentially subject the Company to significant concentration of credit risk consist primarily of cash and cash equivalents. The Company maintains deposits at federally insured financial institutions in excess of federally insured limits. The Company has not experienced any losses in such accounts, and management believes that the Company is not exposed to significant credit risk due to the financial position of the depository institutions in which those deposits are held.

***Trade and Other Receivables***

As amounts become uncollectible, they will be charged to an allowance and operations in the period when a determination of collectability is made. Any estimates of potentially uncollectible customer accounts receivable will be made based on an analysis of individual customer and historical write-off experience. The Company's analysis includes the age of the receivable account, creditworthiness of the customer and general economic conditions.

**BENITEC BIOPHARMA INC.**  
**Notes to Consolidated Financial Statements**  
**(Unaudited)**

***Property and Equipment***

Property and equipment are stated at cost, net of accumulated depreciation and amortization. Expenditures for maintenance and repairs are expensed as incurred; additions, renewals, and improvements are capitalized. When property and equipment are retired or otherwise disposed of, the related cost and accumulated depreciation and amortization are removed from the respective accounts, and any gain or loss is included in operations. Depreciation and amortization of property and equipment is calculated using the straight-line basis over the following estimated useful lives:

Software	3-4 years
Lab equipment	3-7 years
Computer hardware	3-5 years
Leasehold improvements	shorter of the lease term or estimated useful lives

***Impairment of Long-Lived Assets***

Property and equipment are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of long-lived assets to be held and used is measured by a comparison of the carrying amount of an asset to the estimated undiscounted future cash flows expected to be generated by the asset. If the carrying amount of an asset exceeds its estimated undiscounted future cash flows, an impairment charge is recognized by the amount by which the carrying amount of the asset exceeds the fair value of the assets. Fair value is generally determined using the asset's expected future discounted cash flows or market value, if readily determinable.

***Trade and other payables***

These amounts represent liabilities for goods and services provided to the Company prior to the end of the period and which are unpaid. Due to their short-term nature, they are measured at amortized cost and are not discounted. The amounts are unsecured and are usually paid within 30 days of recognition.

***Leases***

At lease commencement, the Company records a lease liability based on the present value of lease payments over the expected lease term. The Company calculates the present value of lease payments using the discount rate implicit in the lease, unless that rate cannot be readily determined. In that case, the Company uses its incremental borrowing rate, which is the rate of interest that the Company would have to pay to borrow on a collateralized basis an amount equal to the lease payments over the expected lease term. The Company records a corresponding right-of-use lease asset based on the lease liability, adjusted for any lease incentives received and any initial direct costs paid to the lessor prior to the lease commencement date.

After lease commencement, the Company measures its leases as follows: (i) the lease liability based on the present value of the remaining lease payments using the discount rate determined at lease commencement; and (ii) the right-of-use lease asset based on the remeasured lease liability, adjusted for any unamortized lease incentives received, any unamortized initial direct costs and the cumulative difference between rent expense and amounts paid under the lease agreement. Any lease incentives received and any initial direct costs are amortized on a straight-line basis over the expected lease term. Rent expense is recorded on a straight-line basis over the expected lease term.

**BENITEC BIOPHARMA INC.**  
**Notes to Consolidated Financial Statements**  
**(Unaudited)**

***Basic and Diluted Net Loss Per Share***

Basic net loss per share is calculated by dividing net loss by the weighted-average number of common shares outstanding during the period. Diluted net loss per share is calculated by dividing net loss by the weighted-average number of common shares outstanding plus potential common shares. Stock options, warrants and convertible instruments are considered potential common shares and are included in the calculation of diluted net loss per share using the treasury stock method when their effect is dilutive. Potential common shares are excluded from the calculation of diluted net income (loss) per share when their effect is anti-dilutive. As of September 30, 2021, and June 30, 2021, there were 809,159 potential common shares, respectively, that were excluded from the calculation of diluted net loss per share because their effect was anti-dilutive.

***Revenue Recognition***

The Company recognizes revenue in accordance with that core principle by applying the following steps:

- Step 1: Identify the contract(s) with a customer.
- Step 2: Identify the performance obligations in the contract.
- Step 3: Determine the transaction price.
- Step 4: Allocate the transaction price to the performance obligations in the contract.
- Step 5: Recognize revenue when (or as) the entity satisfies a performance obligation.

The Company applies judgement in determining whether contracts entered into fall within the scope of ASC 606 – *Revenue from Contracts with Customers* (“ASC 606”). In doing so, management considers the commercial substance of the transaction and how risks and benefits of the contract accrue to the various parties to the contract.

Management has also made the judgement that the grant of the license and transfer of associated know-how and materials are accounted for as one performance obligation as they are not considered to be distinct; they are highly interrelated and could not provide benefits to the customer independently from each other. Judgements were made in relation to the transfer of the license and know-how and whether this should be recognized over time or a point in time. The point in time has been determined with regard to the point at which the transfer of know-how has substantially been completed and the customer has control of the asset and the ability to direct the use of and receive substantially all of the remaining benefits.

***Licensing revenues***

Revenue from licensees of the Company’s intellectual property reflects the transfer of a right to use the intellectual property as it exists at the point in time in which the license is transferred to the customer. Consideration can be variable and is estimated using the most likely amount method. Subsequently, the estimate is constrained until it is highly probable that a significant revenue reversal will not occur when the uncertainty is resolved. Revenue is recognized as or when the performance obligations are satisfied.

**BENITEC BIOPHARMA INC.**  
**Notes to Consolidated Financial Statements**  
**(Unaudited)**

The Company recognizes contract liabilities for consideration received in respect of unsatisfied performance obligations and reports these amounts as other liabilities in the consolidated balance sheet. Similarly, if the Company satisfies a performance obligation before it receives the consideration, the Company recognizes either a contract asset or a receivable in its consolidated balance sheet, depending on whether something other than the passage of time is required before the consideration is due.

*Royalties*

Revenue from licensees of the Company's intellectual property reflect a right to use the intellectual property as it exists at the point in time in which the license is granted. Where consideration is based on sales of product by the licensee, revenue is recognized when the customer's subsequent sales of products occur.

*Services revenue*

Revenue is earned (constrained by variable considerations) from the provision of research and development services to customers. Services revenue is recognized when performance obligations are either satisfied over time or at a point in time. Generally, the provision of research and development services under a contract with a customer will represent satisfaction of a performance obligation over time where the Company retains the right to payment for services performed but not yet completed.

***Research and Development Expense***

Research and development costs are expensed when incurred. These costs have been recognized as an expense when incurred. Research and development expenses relate primarily to the cost of conducting clinical and pre-clinical trials. Pre-clinical and clinical development costs are a significant component of research and development expenses. Estimates have been used in determining the expense liability under certain clinical trial contracts where services have been performed but not yet invoiced. Generally, the costs, and therefore estimates, associated with clinical trial contracts are based on the number of patients, drug administration cycles, the type of treatment and the outcome being that the length of time before actual amounts can be determined will vary depending on length of the patient cycles and the timing of the invoices by the clinical trial partners.

**BENITEC BIOPHARMA INC.**  
**Notes to Consolidated Financial Statements**  
**(Unaudited)**

***Share-based Compensation Expense***

The Company records share-based compensation in accordance with ASC 718, *Stock Compensation*. ASC 718 requires the fair value of all share-based compensation awarded to employees and non-employees to be recorded as an expense over the shorter of the service period or the vesting period. The Company values employee and non-employee share-based compensation at fair value using the Black-Scholes Option Pricing Model.

***Income Taxes***

The Company is subject to Australia and United States income tax laws. The Company follows ASC 740 *Accounting for Income Taxes*, when accounting for income taxes, which requires an asset and liability approach to financial accounting and reporting for income taxes. Deferred income tax assets and liabilities are computed annually for temporary differences between the financial statements and tax bases of assets and liabilities that will result in taxable or deductible amounts in the future based on enacted tax laws and rates applicable to the periods in which the differences are expected to affect taxable income. Valuation allowances are established when necessary to reduce deferred tax assets to the amount more likely than not to be realized.

For uncertain tax positions that meet a “more likely than not” threshold, the Company recognizes the benefit of uncertain tax positions in the consolidated financial statements. The Company’s practice is to recognize interest and penalties, if any, related to uncertain tax positions in income tax expense in the consolidated statements of operations.

***Recent Accounting Pronouncements***

In June 2016, the FASB issued ASUNo. 2016-13: *Financial Instruments – Credit Losses* (Topic 326). This ASU represents a significant change in the accounting for credit losses model by requiring immediate recognition of management’s estimates of current expected credit losses (CECL). Under the prior model, losses were recognized only as they were incurred. The Company has determined that it has met the criteria of a smaller reporting company (“SRC”) as of November 15, 2019. As such, ASU 2019-10: *Financial Instruments-Credit Losses, Derivatives and Hedging, and Leases: Effective Dates* amended the effective date for the Company to be for reporting periods beginning after December 15, 2022. The Company will adopt this ASU effective July 1, 2023.

**3. Going Concern**

The accompanying consolidated financial statements have been prepared assuming that the Company will continue as a going concern. For the three months ended September 30, 2021, and 2020, the Company incurred a net loss of \$5.0 million and \$2.7 million and used net cash of \$4.3 million and \$2.4 million in operations, respectively. The Company expects to continue to incur additional operating losses in the foreseeable future.

As of September 30, 2021, the Company had \$15.7 million in cash and cash equivalents. The Company has performed a review of the cash flow forecasts and believes that the current funding will be sufficient for a period of at least twelve months from the date of this Report.

**BENITEC BIOPHARMA INC.**  
**Notes to Consolidated Financial Statements**  
**(Unaudited)**

The Company's ability to continue as a going concern is dependent upon its ability to generate revenue and obtain adequate financing. While the Company believes in its ability to generate revenue and raise additional funds, there can be no assurances to that effect. The financial statements do not include any adjustments to reflect the possible future effects on the recoverability and classification of assets or the amounts and classification of liabilities that might be necessary if the Company is unable to continue as a going concern due to unsuccessful product development or commercialization, or the inability to obtain adequate financing in the future.

**4. Revenue**

	Three Months ended September 30, 2021	Three Months ended September 30, 2020
Revenues from customers (US\$'000)		
Licensing revenue from services transferred overtime	\$ —	\$ 55

**5. Cash and Cash equivalents**

(US\$'000)	September 30, 2021	June 30, 2021
Cash at Bank	\$ 15,727	\$ 19,769
Total	\$ 15,727	\$ 19,769

**6. Prepaid and other assets**

(US\$'000)	September 30, 2021	June 30, 2021
Prepaid expenses	\$ 763	\$ 967
Security deposit	14	15
Market value of listed shares	34	17
Total other assets	811	999
Less: non-current portion	(169)	(185)
Current portion	\$ 642	\$ 814

**BENITEC BIOPHARMA INC.**  
**Notes to Consolidated Financial Statements**  
**(Unaudited)**

**7. Property and equipment, net**

(US\$'000)	September 30, 2021	June 30, 2021
Software	\$ 14	\$ 14
Lab equipment	1,328	1,329
Computer hardware	26	26
Leasehold improvements	24	24
Total property and equipment, gross	1,392	1,393
Accumulated depreciation and amortization	(1,069)	(1,018)
Total property and equipment, net	\$ 323	\$ 375

Depreciation expense was \$0.1 million for the three months ended September 30, 2021, and \$45 thousand, respectively, for the same period in 2020.

**8. Trade and other payables**

(US\$'000)	September 30, 2021	June 30, 2021
Trade payable	\$ 323	\$ 274
Accrued license fees	135	140
Accrued professional fees	99	13
Accrued OPMD project costs	351	279
Accrued bonuses	112	—
Other payables	86	174
Total	\$ 1,106	\$ 880

**9. Leases**

The Company has entered into an operating lease for office space under an agreement that expires in 2022. The lease requires the Company to pay utilities, insurance, taxes and other operating expenses. The Company's lease does not contain any residual value guarantees or material restrictive covenants. During August 2021, the Company extended the lease through June 2025.

The tables below show the changes during the three months ended September 30, 2021:

(US\$'000)	Operating lease right-of- use assets
Balance at July 1, 2021	\$ 202
Re-measurement during the period	794
Amortization of right of use asset	(49)
Operating lease right-of-use asset at September 30, 2021	\$ 947

**BENITEC BIOPHARMA INC.**  
**Notes to Consolidated Financial Statements**  
**(Unaudited)**

(US\$'000)	<b>Operating lease liabilities</b>
Balance at July 1, 2021	\$ 213
Re-measurement during the period	794
Principal payments on operating lease liabilities	(51)
Operating lease liabilities at September 30, 2021	954
Less: non-current portion	(760)
Current portion at September 30, 2021	<u>\$ 194</u>

As of September 30, 2021, the Company's operating lease has a remaining lease term of 3.71 years and a discount rate of 4.67%. The maturities of the operating lease liabilities are as follows:

(US\$'000)	September 30, 2021
2022	235
2023	287
2024	297
2025	228
Total operating lease payments	1,047
Less imputed interest	(93)
Present value of operating lease liabilities	<u>\$ 954</u>

The Company recorded lease liabilities and right-of-use lease assets for the lease based on the present value of lease payments over the expected lease term, discounted using the Company's incremental borrowing rate. Rent expense was \$0.1 million for the three months ended September 30, 2021 and 2020, respectively, of which \$7 thousand was recorded in the general and administrative expense and \$45 thousand was recorded in research and development expenses.

**BENITEC BIOPHARMA INC.**  
**Notes to Consolidated Financial Statements**  
**(Unaudited)**

**10. Stockholders' equity**

*Common Stock*

On October 6, 2020, the Company announced the closing of an underwritten public offering of 2,666,644 shares of its common stock at a price to the public of \$3.10 per share. The Company also announced that the underwriter fully exercised its over-allotment option to purchase 483,870 additional shares of its common stock at the offering price of \$3.10 per share. The gross and net proceeds were \$11.5 million and \$9.9 million, respectively.

On April 30, 2021, the Company announced the closing of an underwritten public offering of 3,036,366 shares of its common stock at a price to the public of \$4.25 per share. The Company also announced that the underwriter exercised the over-allotment option to purchase 317,274 additional shares of its common stock at the offering price of \$4.25 per share. The gross and net proceeds were \$14.3 million and \$12.7 million, respectively.

*Warrants*

On October 6, 2020, the Company announced the closing of an underwritten public offering of 559,162 shares of common stock underlying pre-funded warrants initially purchased for \$3.09 per share and immediately exercisable at \$0.01 per share ("Pre-Funded Warrants"). All 559,162 Pre-Funded Warrants issued had been exercised as of June 30, 2021.

The activity related to warrants during for the three months ended September 30, 2021, is summarized as follows:

	Common Stock from Warrants	Weighted- average Exercise Price (per share)
Outstanding at July 1, 2021	107,095	\$ 10.50
Outstanding and exercisable at September 30, 2021	107,095	\$ 10.50

**BENITEC BIOPHARMA INC.**  
**Notes to Consolidated Financial Statements**  
**(Unaudited)**

*Equity Incentive Plan*

**Employee Share Option Plan**

Upon the re-domiciliation, the Company assumed BBL's obligations with respect to the settlement of options that were issued by BBL prior to the re-domiciliation pursuant to the Benitec Officers' and Employees' Share Option Plan (the "Share Option Plan"). This includes the Company's assumption of the Share Option Plan and all award agreements pursuant to which each of the options were granted. Each option when exercised entitles the option holder to one share in the Company. Options are exercisable on or before an expiry date, do not carry any voting or dividend rights and are not transferable except on death of the option holder or in certain other limited circumstances. Employee options vest one third on each anniversary of the applicable grant date for three years. If an employee dies, retires or otherwise leaves the Company and certain exercise conditions have been satisfied, generally, the employee has 12 months to exercise their options or the options are cancelled. After there-domiciliation, no new options have been or will be issued under the Share Option Plan.

**Equity and Incentive Compensation Plan**

On December 9, 2020, the Company's stockholders approved the Company's 2020 Equity and Incentive Compensation Plan (the "2020 Plan"). The 2020 Plan provides for the grant of various equity awards. Currently, only stock options are outstanding under the 2020 Plan. Each option when exercised entitles the option holder to one share of the Company's common stock. Options are exercisable on or before an expiry date, do not carry any voting or dividend rights, and are not transferable except on death of the option holder or in certain other limited circumstances. Employee stock options vest in increments of one-third on each anniversary of the applicable grant date for three years. Non-employee director options vest in increments of one-third on the day prior to each of the Company's next three annual stockholder meetings following the grant date. If an option holder dies or terminates employment or service due to Disability (as defined in the 2020 Plan) and certain exercise conditions have been satisfied, generally, the option holder has 12 months to exercise their options or the options are cancelled. If an option holder otherwise leaves the Company, other than for a termination by the Company for Cause (as defined in the 2020 Plan) and certain exercise conditions have been satisfied, generally, the option holder has 90 days to exercise their options or the options are cancelled. Any future equity grants will be made under the 2020 Plan.

**Equity Awards**

The activity related to equity awards, which are comprised of stock options during the three months ended September 30, 2021, is summarized as follows:

	Stock Options	Weighted- average Exercise Price	Weighted- average Remaining Contractual Term	Aggregate Intrinsic Value
Outstanding at June 30, 2021	702,064	\$ 7.16	8.07 years	\$ —
Outstanding at September 30, 2021	702,064	7.16	7.82 years	\$ —
Exercisable at September 30, 2021	54,158	\$ 47.90	1.84 years	\$ —

**BENITEC BIOPHARMA INC.**  
**Notes to Consolidated Financial Statements**  
**(Unaudited)**

**Share-Based Compensation Expense**

The classification of share-based compensation expense is summarized as follows:

(US\$'000)	Three Months Ended September 30,	
	2021	2020
Research and development	\$ 81	\$ 9
General and administrative	190	29
Total share-based compensation expense	<u>\$ 271</u>	<u>\$ 38</u>

As of September 30, 2021, there was \$1 million of unrecognized share-based compensation expense related to stock options issued under the Share Option Plan and the 2020 Plan.

**11. Income taxes**

For the three months ended September 30, 2021, and 2020, the Company did not recognize a provision or benefit for income taxes as it has incurred net losses. In addition, the net deferred tax assets generated from net operating losses are fully offset by a valuation allowance as the Company believes it is more likely than not that the benefit will not be realized.

**12. Commitments and contingencies***Contract commitments*

The Company enters into contracts in the normal course of business with third-party contract research organizations, contract development and manufacturing organizations and other service providers and vendors. These contracts generally provide for termination on notice and, therefore, are cancellable contracts and not considered contractual obligations and commitments.

*Contingencies*

From time to time, the Company may become subject to claims and litigation arising in the ordinary course of business. The Company is not a party to any material legal proceedings, nor is it aware of any material pending or threatened litigation.

**13. Related party transactions**

During the three months ended September 30, 2021, the Company had entered into a related party transaction with Francis Abourizk Lightowlers for legal fees totaling \$1 thousand. Peter Francis, a non-executive director of the Company is a partner at Francis Abourizk Lightowlers. As of September 30, 2021 and June 30, 2021 there were amounts due to this related party of \$1 thousand and \$2 thousand, respectively, included in trade and other payables on the accompanying consolidated balance sheet.

**14. Subsequent events**

The Company has evaluated subsequent events through the filing of this Quarterly Report on Form 10-Q, and determined that there have been no events that have occurred that would require adjustments or disclosures in the consolidated financial statements.

## **Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations**

*You should read the following discussion and analysis of financial condition and operating results together with our consolidated financial statements and the related notes and other financial information included elsewhere in this document.*

### **Overview**

We endeavor to become the leader in discovery, development, and commercialization of therapeutic agents capable of addressing significant unmet medical need via the application of the silence and replace approach to the treatment of genetic disorders.

Benitec Biopharma Inc. (“Benitec” or the “Company” or in the third person, “we” or “our”) is a development-stage biotechnology company focused on the advancement of novel genetic medicines with headquarters in Hayward, California. The proprietary platform, called DNA-directed RNA interference, or ddRNAi, combines RNA interference, or RNAi, with gene therapy to create medicines that facilitate sustained silencing of disease-causing genes following a single administration. The Company is developing ddRNAi-based therapeutics for chronic and life-threatening clinical indications including Oculopharyngeal Muscular Dystrophy (OPMD), and Chronic Hepatitis B.

BB-301 is the most advanced ddRNAi-based genetic medicine currently under development by Benitec. BB-301 is an AAV-based gene therapy designed to both silence the expression of mutated, disease-causing genes (to slow, or halt, the underlying mechanism of disease progression) and simultaneously replace the mutant genes with normal, “wild type” genes (to drive restoration of function in diseased cells). This fundamental therapeutic approach to disease management is called “silence and replace” and this biological mechanism offers the potential to restore the underlying physiology of the treated tissues and, in the process, improve treatment outcomes for patients suffering from the chronic and, potentially, fatal effects of Oculopharyngeal Muscular Dystrophy (OPMD). BB-301 has been granted Orphan Drug Designation in the United States and the European Union.

Through the combination of the targeted gene silencing effects of RNAi and the durable transgene expression achievable via the use of modified viral vectors, the silence and replace approach has the potential to produce long-term silencing of disease-causing genes along with simultaneous replacement of wild type gene function following a single administration of the proprietary genetic medicine. We believe this novel attribute of the investigational agents under development by Benitec may facilitate the achievement of robust clinical activity while greatly reducing the dosing frequencies traditionally expected for medicines employed for the management of chronic diseases. Additionally, the achievement of long-term gene silencing and gene replacement may significantly reduce the risk of patient non-compliance during the course of medical management of potentially fatal clinical disorders.

### Re-domiciliation

On April 15, 2020, (the “Implementation Date”), the re-domiciliation of Benitec Biopharma Limited (the “Re-domiciliation”), a public company incorporated under the laws of the State of Western Australia, or BBL, was completed in accordance with the Scheme Implementation Agreement, as amended and restated as of January 30, 2020, between BBL and us. As a result of the Re-domiciliation, the jurisdiction of incorporation was changed from Australia to Delaware, and BBL became our wholly owned subsidiary.

The Re-domiciliation was effected pursuant to a statutory scheme of arrangement under Australian law, or the Scheme, whereby on the Implementation Date, all of the issued and outstanding ordinary shares of BBL were exchanged for newly issued shares of our common stock, on the basis of one share of our common stock, par value \$0.0001 per share, for every 300 ordinary shares of BBL issued and outstanding. Holders of BBL’s American Depository Shares, or ADSs (each of which represented 200 ordinary shares), received two shares of our common stock for every three ADSs held.

---

## [Table of Contents](#)

### COVID-19

COVID-19 has been declared a pandemic by the World Health Organization and has spread to nearly every country, including Australia and the United States. The impact of this pandemic has been and will likely continue to be extensive in many aspects of society, which has resulted in and will likely continue to result in significant disruptions to businesses and capital markets around the world. The extent to which the coronavirus impacts us will depend on future developments, which are highly uncertain and cannot be predicted, including new information which may emerge concerning the severity of the coronavirus and its variants, and the actions to contain the coronavirus or treat its impact, including the effectiveness and adoption of vaccines for the virus, among others.

Certain of our research and development efforts are conducted globally, including the ongoing development of our silence and replace therapeutic for the treatment of Oculopharyngeal Muscular Dystrophy (OPMD), and will be dependent upon our ability to initiate preclinical and clinical studies despite the ongoing COVID-19 pandemic.

As we continue to actively advance our preclinical programs, including our ongoing Toxicology and Biodistribution study for BB-301, we are in close contact with our principal investigators and preclinical trial sites, which are primarily located in France, and are assessing the impact of COVID-19 on our studies and the expected development timelines and costs, on an ongoing basis. In light of developments relating to the COVID-19 global pandemic since the beginning of the outbreak, the focus of healthcare providers and hospitals on fighting the virus, and consistent with the FDA's industry guidance for conducting clinical trials, we have experienced delays to the original timeline regarding the initiation and anticipated completion of the ongoing BB-301 Clinical Trial Application (CTA)-enabling and Investigational New Drug Application (IND)-enabling development work. The initiation of the BB-301 Pilot Dosing Study in Beagle dogs, which represents a key component of the CTA-enabling and IND-enabling work, was delayed by several months, however, the study has been completed without incident. The acquisition of chemical reagents, biological reagents and laboratory supplies which are essential for the conduct of basic laboratory research, nonclinical studies and GMP manufacturing of BB-301, has also become challenging due to the disruption of global supply chains inherent to the production of these materials. We will continue to evaluate the impact of the COVID-19 pandemic on our business and expect to reevaluate the timing of our anticipated preclinical and clinical milestones as we learn more and the impact of COVID-19 on our industry becomes clearer.

We have also implemented a rotation system whereby staff work from home and attend the laboratory on designated days which may result in a reduction of laboratory work and a halt of non-essential business travel. As we transition our employees back to our premises, there is a risk that COVID-19 infections occur at our offices or laboratory facilities and significantly affect our operations. Additionally, if any of our critical vendors are impacted, our business could be affected if we become unable to timely procure essential equipment, supplies or services in adequate quantities and at acceptable prices.

---

## [Table of Contents](#)

BB-301 is a first-in-class genetic medicine employing the “silence and replace” approach for the treatment of OPMD. OPMD is an insidious, autosomal-dominant, late-onset, degenerative muscle disorder that typically presents in patients at 40-to-50 years of age. The disease is characterized by progressive swallowing difficulties (dysphagia) and eyelid drooping (ptosis). OPMD is caused by a specific mutation in the poly(A)-binding protein nuclear 1 gene (PABPN1). OPMD is a rare disease, however, patients have been diagnosed with OPMD in at least 33 countries. Patient populations suffering from OPMD are well-identified, and significant geographical clustering has been noted for patients with this disorder, which could simplify clinical development and global commercialization efforts.

PABPN1 is a ubiquitous factor that promotes the interaction between the poly(A) polymerase and CPSF (cleavage and polyadenylation specificity factor) and, thus, controls the length of mRNA poly(A) tails, mRNA export from the nucleus, and alternative poly(A) site usage. The characteristic genetic mutation underlying OPMD results in trinucleotide repeat expansion(s) within exon 1 of PABPN1 and results in an expanded poly-alanine tract at the N-terminal end of PABPN1. The mutation generates a protein with an N-terminal expanded poly-alanine tract of up to 18 contiguous alanine residues, and the mutant protein is prone to the formation of aggregates called intranuclear inclusions (INIs). The INIs that sequester wildtype PABPN1 could also contribute to loss of the function phenotype associated with OPMD.

Currently, no therapeutic agents are approved for the treatment of OPMD. Additionally, no surgical interventions capable of altering the long-term natural history of OPMD are available. BB-301 has received Orphan Drug Designation in the United States and the European Union which provides commercial exclusivity independent of intellectual property protection. While OPMD is a rare disorder, we believe the commercial opportunity for a safe and efficacious therapeutic agent in this clinical indication exceeds \$1 billion over the course of the commercial life of the product.

Benitec has previously outlined the core CTA-enabling and IND-enabling studies required by global regulatory agencies to support the initiation of BB-301 clinical trials in OPMD patients, and these studies include a BB-301 Pilot Dosing Study (the “Pilot Dosing Study”) in large animals and a classical 12-week GLP Toxicology and Biodistribution Study. BB-301 is directly injected into the pharyngeal muscles known to underlie the morbidity and mortality characterizing the natural history of OPMD.

The BB-301 Pilot Dosing Study is the first of two planned CTA-enabling and IND-enabling studies that were designed to be conducted in large animals. These studies continue to be carried out under the guidance of the scientific team at Benitec, with key elements of the study design and execution conducted in close collaboration with a team of leading experts in both medicine and surgery that have been deeply engaged in the treatment of OPMD patients for several decades. The BB-301 Pilot Dosing Study, along with the subsequent GLP Toxicology and Biodistribution Study, will be conducted in canine subjects and will support the validation and optimization of the newly designed method of BB-301 administration, confirm the efficiency of vector transduction and transgene expression in the key tissue compartments underlying the natural history of OPMD, confirm the optimal drug doses in advance of initiation of human clinical studies, and facilitate observation of key toxicological data-points.

The BB-301 Pilot Dosing Study was designed as an 8-week study in Beagle dogs to confirm the transduction efficiency of BB-301 upon administration via direct intramuscular injection into specific anatomical regions of the pharynx through the use of an open surgical procedure. This new route of BB-301 administration was developed in collaboration with key surgical experts in the field of Otolaryngology, and this novel method of BB-301 dosing will significantly enhance the ability of a treating physician to accurately administer the AAV-based investigational agent to the muscles that underlie the characteristic deficits associated with the progression of OPMD. It is important to note that prior non-clinical studies of BB-301 have reproducibly validated the robust biological activity achieved following direct intramuscular injection. As an example, direct injection of BB-301 into the tibialis anterior muscles of A17 mice facilitated robust transduction of the targeted skeletal muscle cells and supported complete remission of the OPMD disease phenotype in this animal model.

## Table of Contents

Benitec conducted the BB-301 Pilot Dosing Study in Beagle dog subjects to demonstrate that direct intramuscular injection of BB-301 via the use of a proprietary dosing device in an open surgical procedure could safely achieve the following goals:

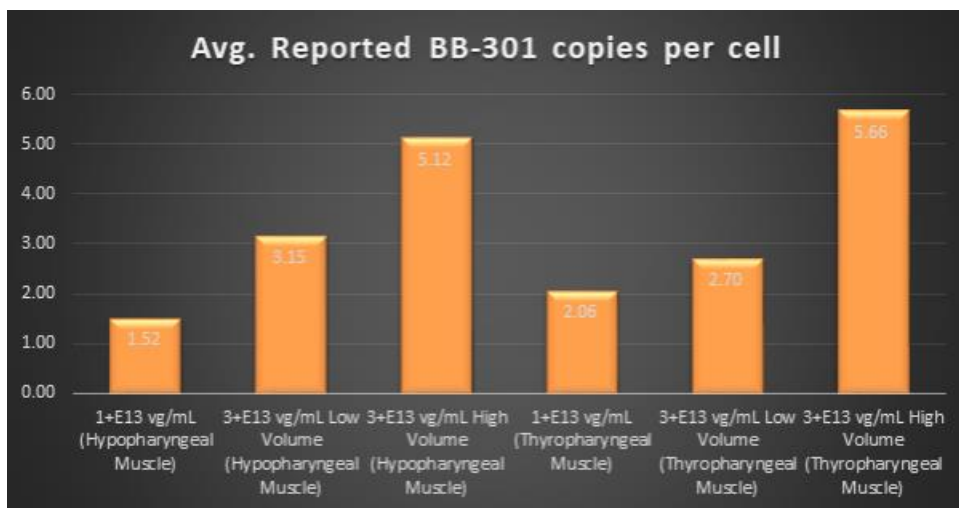

- Biologically significant and dose-dependent levels of BB-301 tissue transduction (i.e., delivery of the multi-functional BB-301 genetic construct into the target pharyngeal muscle cells);
- Broad-based and dose-dependent expression of the three distinct genes comprising the BB-301 gene construct within the pharyngeal muscle cells; and
- Durable and biologically significant levels of target gene knock-down (i.e., inhibition of the expression of the gene of interest) within the pharyngeal muscle cells.

The Pilot Dosing Study evaluated the safety and biological activity of two concentrations of BB-301 (1.0+E13 vg/mL and 3.0+E13 vg/mL) across three distinct doses (1.0+E13 vg/mL and 3.0+E13 vg/mL with a low injection volume, and 3.0+E13 vg/mL with a high injection volume) following direct intramuscular injection into the Hypopharyngeus (HP) muscles and the Thyropharyngeus (TP) muscles of Beagle dogs via the use of a proprietary delivery device employed in an open surgical procedure. The HP muscle in Beagle dogs corresponds to the Middle Pharyngeal Constrictor muscle in human subjects, and the TP muscle in Beagle dogs corresponds to the Inferior Pharyngeal Constrictor muscle in human subjects. BB-301 was injected only on Day 1 of the Pilot Dosing Study, and the corresponding canine pharyngeal muscles were harvested for analysis after 8 weeks of observation post-dosing. BB-301 dosing was carried out by both a veterinary surgeon and a practicing Otolaryngologist who has extensive experience with the provision of palliative surgical care for OPMD patients.

Further data analyses are ongoing for the canine subjects treated in the BB-301 Pilot Dosing Study, and the interim data-points highlighted here are derived from completed analyses of pharyngeal muscle tissues isolated from 16 Beagle dog subjects (of the 24-subject study population). The data-set derived from the Pilot Dosing Study and the formal conclusions will be updated as additional study subjects are analyzed.

The key preliminary results are summarized here:

**Figure 4. Pharyngeal Muscle Tissue Transduction Levels for BB-301**

**Regarding Gene Expression Levels Observed for BB-301 Within the Pharyngeal Muscle Tissues (Figure 5, Figure 6, Figure 7):**

[Table of Contents](#)

- BB-301 encodes two distinct siRNA species (i.e., siRNA13 and siRNA17) which are each, independently, capable of inhibiting (i.e., “silencing”) the expression of the mutant form of the PABPN1 protein and the wildtype (i.e., endogenous) form of the PABPN1 protein (importantly, the mutant form of the PABPN1 protein underlies the development and progression of OPMD).
- BB-301 also codes for a wildtype version of the PABPN1 protein whose intracellular expression is unaffected by the inhibitory activities of siRNA13 and siRNA17, and this codon optimized PABPN1 protein (i.e., coPABPN1) serves to replenish the endogenous form of the PABPN1 protein and to replace the mutant form of PABPN1 that underlies the development and progression of OPMD in diseased tissues.
- For comparative purposes, it should be noted that the average range of expression for wild type PABPN1 within the pharyngeal muscle cells of Beagle dogs is 4.5 copies per cell-to-7.8 copies per cell.

**Figure 5. siRNA13 Expression Levels for BB-301 within Pharyngeal Muscle Tissues**

Figure 6. siRNA17 Expression Levels for BB-301 within Pharyngeal Muscle Tissues

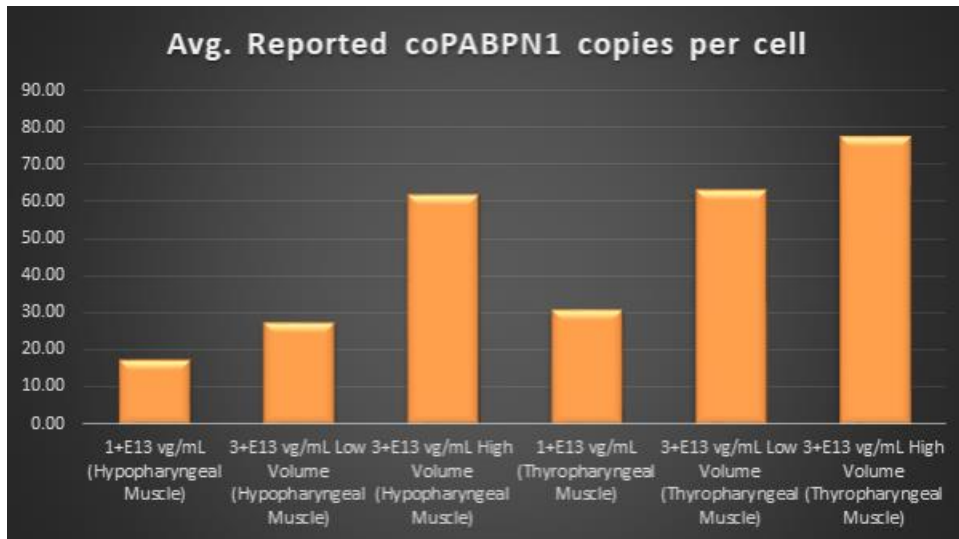

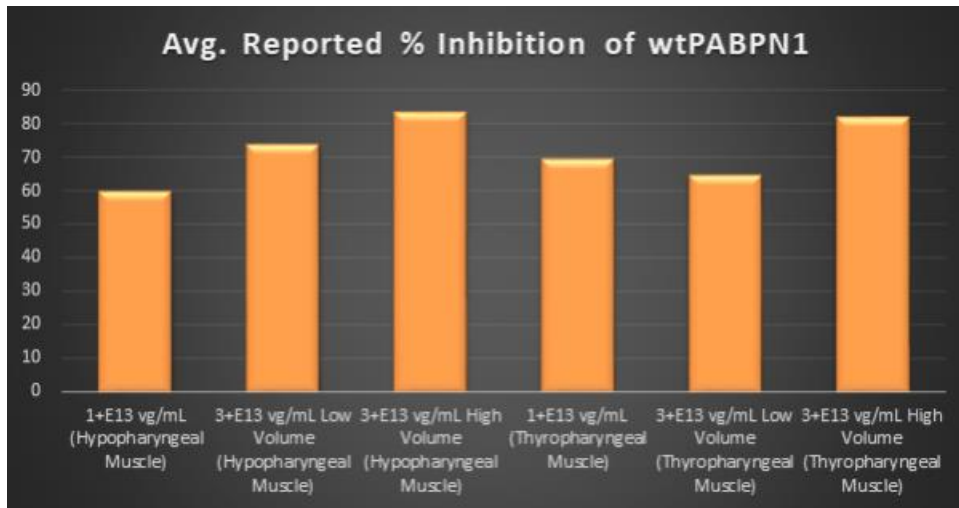

Figure 7. coPABPN1 Expression Levels for BB-301 within Pharyngeal Muscle Tissues

**Regarding WildType PABPN1 Silencing (i.e. target “knock-down”) Observed for BB-301 Within the Pharyngeal Muscle Tissues (Figure 8):**

- As noted above, BB-301 encodes two distinct siRNA species (i.e. siRNA13 and siRNA17) which are each, independently, capable of inhibiting (i.e., “silencing”) the expression of all forms of the PABPN1 protein (siRNA13 and siRNA17 silence the expression of both wildtype PABPN1 [wtPABPN1] and mutant PABPN1).
- While the Beagle dog subjects treated in the current BB-301 Pilot Dosing Study do not express mutant PABPN1, the level of BB-301-driven gene silencing for the PABPN1 target can be indirectly assessed due to the equivalent inhibitory effects of siRNA13 and siRNA17 on both wtPABPN1 and mutant PABPN1.
- Thus, the wtPABPN1 silencing activity observed in the current BB-301 Pilot Dosing Study serves as a surrogate for the activity that would be anticipated in the presence of mutant PABPN1.
- BB-301 has been evaluated in prior non-clinical studies in animals that express mutant PABPN1 and, as a consequence, manifest the key signs and symptoms of OPMD; in these animal models of OPMD, the achievement of PABPN1 silencing levels of 31% inhibition or higher led to complete resolution of OPMD disease symptoms and correction of the histological hallmarks of OPMD.

**Figure 8. PABPN1 Silencing (i.e. “target knock-down”) within Pharyngeal Muscle Tissues**

[Table of Contents](#)

Finally, it is critical to highlight the key methodological distinctions between the current BB-301 Pilot Dosing Study conducted by Benitec as compared to the prior BB-301 Beagle dog dosing study carried out independently by the previous BB-301 licensee. The BB-301 dosing study conducted by the prior BB-301 licensee employed non-ideal routes and methods of BB-301 administration to the target pharyngeal muscle tissues and employed similarly limited analytical methods at the completion of the dosing phase of the study. The Benitec team worked to optimize the route and method of administration of BB-301 and to refine the core analytical methods employed following the completion of dosing.

The newly developed proprietary methods of BB-301 delivery, as well as the analytical methods developed to assay the key target tissues of the Beagle dog subjects, led to the observation of broad-based transduction of the pharyngeal muscle target tissues (**Figure 9, individual sections of the TP muscle following BB-301 dosing**) and demonstrated a 228-fold improvement (+22,647%) in BB-301 transduction of the HP muscle and a 113-fold improvement (+11,163%) in BB-301 transduction of the TP muscle relative to the levels of BB-301 transduction observed by the previous BB-301 licensee (**Figure 10**).

**Figure 9. BB-301 Transduction Levels Achieved for Individual Sections of the TP Muscle Following BB-301 dosing**

**Figure 10. Impact of Benitec-Initiated Methodological Improvements to the BB-301 Large Animal Study Design on the Relative Pharyngeal Muscle Tissue Transduction Levels Achieved**

Following the disclosure of the positive BB-301 Pilot Dosing Study data, Benitec completed a Scientific Advice meeting with The National Agency for the Safety of Medicines and Health Products in France (L'Agence nationale de sécurité du médicament et des produits de santé or "ANSM") in the first half of 2021.

**The Scientific Advice meeting was conducted to review and confirm the adequacy of:**

- The non-clinical data derived from the evaluation of BB-301 in both the murine proof-of-concept studies and the Pilot Dosing study in Beagle dogs
- The experimental, analytical, and statistical methods comprising the 12-week BB-301 GLP Toxicology and Biodistribution study in Beagle dogs
- The large-scale manufacturing plan for clinical grade BB-301 drug product for use in the Phase 1b/2a clinical study in OPMD patients
- The design of the Phase 1b/2a clinical study slated for initiation in 2022

The BB-301 Pilot Dosing Study was viewed as an appropriate dose range finding study. The preliminary data derived from the Pilot Dosing Study regarding BB-301 pharyngeal muscle tissue transduction, BB-301 transgene expression, and the resulting knock-down of wild type PABPN1 supported the adequacy of the data derived from this study to inform the choice of BB-301 doses for use in the GLP Toxicology and Biodistribution Study. The design of the GLP Toxicology and Biodistribution study was viewed as appropriate to support first-in-human testing of BB-301. Pending the final results of the ongoing GLP Toxicology and Biodistribution study, the BB-301 Pilot Dosing Study data and the murine proof-of-concept study data are sufficient to inform the choice of the BB-301 drug doses employed in the upcoming Phase 1b/2a study. As BB-301 drug product has been reproducibly manufactured at large-scale in the past, the manufacturing plan for clinical grade BB-301 drug product can be conducted under GMP conditions with a production process analogous to that that employed in prior large-scale production runs. Finally, the design of the Phase 1b/2a clinical trial can support the evaluation of BB-301 safety and clinical efficacy in key populations of OPMD patients.

Regarding our regulatory interactions with the FDA, Benitec has been granted a Type C meeting in the fourth quarter of 2021.

Regarding our regulatory interactions with Health Canada, Benitec has been granted apre-CTA meeting in the fourth quarter of 2021.

Benitec continues to plan for the initiation of the First-in-Human clinical study of BB-301 in OPMD patients in 2022.

---

***BB-103***

BB-103 has demonstrated robust nonclinical activity during the evaluation of this agent for the treatment of Chronic Hepatitis B Virus infection. Benitec is currently seeking strategic partners to advance BB-103 through IND-enabling studies.

Royalties, milestone payments and other license fees

We are required to pay royalties, milestone payments and other license fees in connection with our licensing of intellectual property from third parties, including as discussed below.

We have collaborated with Biomics Biotechnologies Co., Ltd., or Biomics, pursuant to several collaboration agreements in relation to single-stranded RNA and shRNA sequences for treatment of hepatitis B. In July 2015, we entered into an earn-out agreement with Biomics which confirmed Benitec's ownership of certain patents resulting from the collaboration in exchange for an upfront payment and equity issuance to Biomics and a share of certain future licensing revenue received by Benitec.

## [Table of Contents](#)

### Foreign Currency Translation and Other Comprehensive Income (Loss)

The Company's functional currency and reporting currency is the United States dollar. BBL's functional currency is the Australian dollar (AUD). Assets and liabilities are translated at the exchange rate in effect at the balance sheet date. Revenues and expenses are translated at the average rate of exchange prevailing during the reporting period. Equity transactions are translated at each historical transaction date spot rate. Translation adjustments arising from the use of different exchange rates from period to period are included as a component of stockholders' equity as "Accumulated other comprehensive loss." Gains and losses resulting from foreign currency translation are included in the consolidated statements of operations and comprehensive loss as other comprehensive income (loss).

Other comprehensive income for all periods presented includes only foreign currency translation gains.

### October 2020 Capital Raise

On October 6, 2020, the Company announced the closing of an underwritten public offering of common stock and common stock equivalents. The Company received gross proceeds of approximately \$11.5 million and net proceeds of approximately \$9.9 million from the offering.

### April 2021 Capital Raise

On April 30, 2021, the Company announced the closing of an underwritten public offering of common stock and common stock equivalents. The Company received gross proceeds of approximately \$14.3 million and net proceeds of approximately \$12.7 million from the offering.

## **Results of Operations**

### **Revenues**

The Company has not generated any revenues from the sales of products. Revenues from licensing fees and interest income are included in the revenue from customers line item on our statements of operations and comprehensive loss. Our licensing fees have been generated through the licensing of our ddRNAi technology to biopharmaceutical companies. The following table sets forth a summary of our revenues for each of the periods set forth below:

	Three Months Ended September 30,	
	2021	2020
	(US\$'000)	
<b>Revenues:</b>		
Revenues from customers	\$ —	\$ 55
Total revenues	\$ —	\$ 55

### *Revenues from customers*

During the three months ended September 30, 2021 and 2020, respectively, the Company recognized \$0 and \$0.1 million in customer revenues. The decrease in revenues from customers is due to the decrease in licensing and royalty revenues in the current period.

## [Table of Contents](#)

### ***Royalties and License Fees***

Royalties and license fees consist primarily of payments we are required to remit for royalties and other payments related to in-licensed intellectual property. Under our in-license agreements, we may pay up-front fees and milestone payments and be subject to future royalties. We cannot precisely predict the amount, if any, of royalties we will owe in the future, and if our calculations of royalty payments are incorrect, we may owe additional royalties, which could negatively affect our results of operations. As our product sales increase, we may, from time to time, disagree with our third-party collaborators as to the appropriate royalties owed, and the resolution of such disputes may be costly, may consume management's time, and may damage our relationship with our collaborators. Furthermore, we may enter into additional license agreements in the future, which may also include royalty, milestone and other payments.

### ***Research and Development Expenses***

Research and development expenses relate primarily to the cost of conducting clinical and pre-clinical trials.

Pre-clinical and clinical development costs are a significant component of research and development expenses. The Company records accrued liabilities for estimated costs of research and development activities conducted by third-party service providers, which include the conduct of pre-clinical studies and clinical trials, and contract manufacturing activities. The Company records the estimated costs of research and development activities based upon the estimated amount of services provided but not yet invoiced and includes these costs in trade and other payables on the consolidated balance sheets and within research and development expenses on the consolidated statements of operations and comprehensive loss.

The Company accrues for these costs based on factors such as estimates of the work completed and in accordance with agreements established with its third-party service providers. The Company makes significant judgments and estimates in determining the accrued liabilities balance at the end of each reporting period. As actual costs become known, the Company adjusts its accrued liabilities. The Company has not experienced any material differences between accrued costs and actual costs incurred.

### ***General and Administrative Expenses***

General and administrative expenses consist primarily of salaries, related benefits, travel, and equity-based compensation expense. General and administrative expenses also include facility expenses, professional fees for legal, consulting, accounting and audit services and other related costs.

We anticipate that our general and administrative expenses may increase as the Company focuses on the continued development of the pre-clinical OPMD program. The Company also anticipates an increase in expenses relating to accounting, legal and regulatory-related services associated with maintaining compliance with exchange listing and SEC requirements, director and officer insurance premiums and other costs associated with being a domestic public company after the Re-domiciliation.

### **Operating Expenses**

The following tables set forth a summary of our expenses for each of the periods set forth below:

	Three Months Ended September 30,	
	2021	2020
	(US\$'000)	
<b>Operating Expenses:</b>		
Royalties and license fees	\$ —	\$ 134
Research and development	2,780	774
General and administrative	<u>2,042</u>	<u>1,837</u>
Total operating expenses	<u>\$ 4,822</u>	<u>\$ 2,745</u>

## [Table of Contents](#)

During the three months ended September 30, 2021 and 2020, respectively, we incurred \$0 and \$0.1 million in royalties and license fees.

During the three months ended September 30, 2021 and 2020, respectively, we incurred \$2.8 million and \$0.8 million in research and development expenses. The increase in research and development expenses is primarily related to the commencement of the BB-301 Regulatory Toxicology Study in Beagles at Charles River Laboratories in Evreux, France. As planned, the Company began incurring more costs related to the execution of two large nonclinical studies in Beagles, along with the commercial-scale GMP-grade manufacturing of BB-301, all of which is required to facilitate the CTA filing and the IND filing for BB-301 in 2022.

General and administrative expense was \$2.0 million and \$1.8 million for the three months ended September 30, 2021 and 2020. The increase for the three month period was due to the small increases in insurance, consultants, legal and accounting fees.

### **Other Income (Expense)**

The following tables set forth a summary of our other income (loss) for each of the periods set forth below:

	Three Months Ended September 30,	
	2021	2020
<b>Other Income (Loss):</b>		
<b>(US\$'000)</b>		
Foreign currency transaction loss	\$ (240)	\$ (54)
Interest expense, net	(1)	(1)
Other income, net	—	27
Unrealized gain on investment	18	—
Total other loss, net	<u>\$ (223)</u>	<u>\$ (28)</u>

The other loss, net during the three months ended September 30, 2021 and 2020, respectively, totaled \$0.2 million and \$28 thousand, which consists of foreign currency transaction loss, interest expense, other income, and unrealized gain on investment. Foreign currency transaction gain has increased due to a change in foreign exchange rates. Other income, net decreased due to no longer receiving COVID-19 stimulus incentives from the Australian government in 2021. Unrealized gain on investment had a minor increase for the three months ended September 30, 2021, compared to the three months ended September 30, 2020.

### **Liquidity and Capital Resources**

The Company has incurred cumulative losses and negative cash flows from operations since our predecessor's inception in 1995. The Company had accumulated losses of \$135.2 million as of September 30, 2021. We expect that our research and development expenses may increase due to the continued development of the OPMD program. It is also likely that there will be an increase in the general and administrative expenses due to the obligations of being a domestic public company in the United States as a result of the Re-domiciliation.

We had no borrowings as at September 30, 2021 and do not currently have a credit facility.

As of September 30, 2021, we had cash and cash equivalents of approximately \$15.7 million. Cash in excess of immediate requirements is invested in accordance with our investment policy, primarily with a view to liquidity and capital preservation. Currently, our cash and cash equivalents are held in bank accounts.

## Table of Contents

The following table sets forth a summary of the net cash flow activity for each of the periods set forth below:

	Three Months Ended September 30,	
	2021	2020
	(US\$'000)	
Net cash provided by (used in):		
Operating activities	\$(4,278)	\$(2,360)
Investing activities	—	(173)
Effects of exchange rate changes on cash and cash equivalents	236	182
Net decrease in cash	<u><u>\$(4,042)</u></u>	<u><u>\$(2,351)</u></u>

### *Operating activities*

Net cash used in operating activities for the three months ended September 30, 2021 and 2020 was \$4.3 million and \$2.4 million, respectively. Net cash used in operating activities was primarily the result of our net loss and change in working capital and a decrease in payables.

### *Investing activities*

Net cash used in investing activities for the three months ended September 30, 2021 and 2020 was \$0 and \$0.2 million, respectively. The change was primarily related to a decrease in purchases of equipment in 2021 as there were none compared to purchases of \$0.2 million in the same period of 2020.

The future of the Company as an operating business will depend on its ability to manage operating costs and budgeted amounts and obtain adequate financing. While we continue to progress discussions and advance opportunities to engage with pharmaceutical companies and continue to seek licensing partners for ddRNAi in disease areas that are not our focus, there can be no assurance as to whether we will enter into such arrangements or what the terms of any such arrangement could be.

While we have established some licensing arrangements, we do not have any products approved for sale and have not generated any revenue from product sales. We do not know when, or if, we will generate any revenue from product sales. We do not expect to generate significant revenue from product sales unless and until we obtain regulatory approval of and commercialize one of our current or future product candidates.

Unless and until we establish significant revenues from licensing programs, strategic alliances or collaboration arrangements with pharmaceutical companies, or from product sales, we anticipate that we will continue to generate losses for the foreseeable future, and we expect the losses to increase as we continue the development of product candidates and begin to prepare to commercialize any product that receives regulatory approval. We are subject to the risks inherent in the development of new gene therapy products, and we may encounter unforeseen expenses, difficulties, complications, delays and other unknown factors that may adversely affect our business. We estimate that our cash and cash equivalents will be sufficient to fund the Company's operations at least for the next twelve months.

---

## [Table of Contents](#)

We have based our projections of operating capital requirements on assumptions that may prove to be incorrect and we may use all of our available capital resources sooner than we expect. Because of the numerous risks and uncertainties associated with research, development and commercialization of pharmaceutical products, we are unable to estimate the exact amount of our operating capital requirements. Our future funding requirements will depend on many factors, including, but not limited to:

- the timing and costs of our planned clinical trials for our ddRNAi and silence and replace product candidates;
- the timing and costs of our planned preclinical studies for our ddRNAi and silence and replace product candidates;
- the number and characteristics of product candidates that we pursue;
- the outcome, timing and costs of seeking regulatory approvals;
- revenue received from commercial sales of any of our product candidates that may receive regulatory approval;
- the terms and timing of any future collaborations, licensing, consulting or other arrangements that we may establish;
- the amount and timing of any payments we may be required to make, or that we may receive, in connection with the licensing, filing, prosecution, defense and enforcement of any patents or other intellectual property rights;
- the costs of preparing, filing and prosecuting patent applications, maintaining and protecting our intellectual property rights and defending against intellectual property related claims; and
- the extent to which we need to in-license or acquire other products and technologies.

### **Contractual Obligations and Commercial Commitments**

On October 1, 2016, the Company entered into an operating lease for office space in Hayward, California that originally expired in April 2018. The Company has entered into lease amendments that extend the lease commitment through June 2025.

The Company enters into contracts in the normal course of business with third-party contract research organizations, contract development and manufacturing organizations and other service providers and vendors. These contracts generally provide for termination on notice and, therefore, are cancellable contracts and not considered contractual obligations and commitments.

### **Off-Balance Sheet Arrangements**

The Company had no material off-balance sheet arrangements as of September 30, 2021.

### **Critical Accounting Policies and Significant Accounting Estimates**

The preparation of consolidated financial statements and related disclosures in conformity with accounting principles generally accepted in the United States of America requires management to make judgments, assumptions and estimates that affect the amounts reported. Note 2 of the Notes to Consolidated Financial Statements included in this Quarterly Report on Form 10-Q describes the significant accounting policies used in the preparation of the consolidated financial statements. Certain of these significant accounting policies are considered to be critical accounting policies.

---

## [Table of Contents](#)

A critical accounting policy is defined as one that is both material to the presentation of the Company's consolidated financial statements and requires management to make difficult, subjective or complex judgments that could have a material effect on the Company's financial condition or results of operations. Specifically, these policies have the following attributes: (1) the Company is required to make assumptions about matters that are highly uncertain at the time of the estimate; and (2) different estimates the Company could reasonably have used, or changes in the estimate that are reasonably likely to occur, would have a material effect on the Company's financial condition or results of operations.

Estimates and assumptions about future events and their effects cannot be determined with certainty. The Company bases its estimates on historical experience and on various other assumptions believed to be applicable and reasonable under the circumstances. These estimates may change as new events occur, as additional information is obtained and as the Company's operating environment changes. These changes have historically been minor and have been included in the consolidated financial statements as soon as they became known. In addition, management is periodically faced with uncertainties, the outcomes of which are not within its control and will not be known for prolonged periods of time. These uncertainties are discussed in the section above entitled "Risk Factors." Based on a critical assessment of its accounting policies and the underlying judgments and uncertainties affecting the application of those policies, management believes that the Company's consolidated financial statements are fairly stated in accordance with accounting principles generally accepted in the United States of America and provide a meaningful presentation of the Company's financial condition and results of operations.

Management believes that the following are critical accounting policies:

### ***Research and Development Expense***

Research and development expenses relate primarily to the cost of conducting clinical and pre-clinical trials. Pre-clinical and clinical development costs are a significant component of research and development expenses. The Company records accrued liabilities for estimated costs of research and development activities conducted by third-party service providers, which include the conduct of pre-clinical studies and clinical trials, and contract manufacturing activities. The Company records the estimated costs of research and development activities based upon the estimated amount of services provided but not yet invoiced and includes these costs in trade and other payables on the consolidated balance sheets and within research and development expenses on the consolidated statements of operations and comprehensive loss.

The Company accrues for these costs based on factors such as estimates of the work completed and in accordance with agreements established with its third-party service providers. The Company makes significant judgments and estimates in determining the accrued liabilities balance at the end of each reporting period. As actual costs become known, the Company adjusts its accrued liabilities. The Company has not experienced any material differences between accrued costs and actual costs incurred.

### ***Share-based Compensation Expense***

The Company records share-based compensation in accordance with ASC 718, *Stock Compensation*. ASC 718 requires the fair value of all share-based employee compensation awarded to employees and non-employees to be recorded as an expense over the shorter of the service period or the vesting period. The Company values employee and non-employee share-based compensation at fair value using the Black-Scholes Option Pricing Model.

### **Recent Accounting Pronouncements**

#### ***Accounting Standards recently adopted***

None.

#### ***New Accounting Standards and Interpretations not yet mandatory or early adopted***

**ASU 2016-13**—In June 2016, the FASB issued ASU No. 2016-13: "*Financial Instruments—Credit Losses (Topic 326)*". This ASU represents a significant change in the accounting for credit losses model by requiring immediate recognition of management's estimates of current expected credit losses (CECL). Under the prior model, losses were recognized only as they were incurred. The Company has determined that it has met the criteria of a smaller reporting company ("SRC") as of November 15, 2019. As such, ASU 2019-10: "*Financial Instruments—Credit Losses, Derivatives and Hedging, and Leases: Effective Dates*" amended the effective date for the Company to be for reporting periods beginning after December 15, 2022. The Company will adopt this ASU effective July 1, 2023.

---

[Table of Contents](#)

**Item 3. Quantitative and Qualitative Disclosures About Market Risk**

As a smaller reporting company, we are not required to provide the information pursuant to this Item.

**Item 4. Controls and Procedures**

We have established disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended). As of the end of the period covered by this Report we carried out an evaluation under the supervision and with the participation of our management, including our principal executive officer and principal financial and accounting officer, of the effectiveness of the design and operation of our disclosure controls and procedures pursuant to Rule 13a-15 of the Securities and Exchange Act of 1934, as amended. Based upon that evaluation, our principal executive officer and principal financial and accounting officer concluded that our disclosure controls and procedures are effective.

There were no changes in our internal controls over financial reporting during the quarter ended September 30, 2021 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

We do not expect that our disclosure controls and procedures or our internal controls will prevent all errors and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, have been detected.

**PART II**  
**OTHER INFORMATION**

**Item 1. Legal Proceedings**

We are currently not a party to any material legal proceedings.

**Item 1A. Risk Factors**

There have been no material changes to the risk factors disclosed in Item 1A of the Company's Annual Report on Form 10-K for the fiscal year ended June 30, 2021.

**Item 2. Unregistered Sales of Equity Securities and Use of Proceeds**

None.

**Item 3. Defaults Upon Senior Securities**

None.

**Item 4. Mine Safety Disclosures**

None.

**Item 5. Other Information**

None.

(principal executive officer)

**Statement Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002 by  
Principal Executive Officer  
Regarding Facts and Circumstances Relating to Exchange Act Filings**

I, Jerel Banks, certify that:

1. I have reviewed this quarterly report on Form 10-Q of Benitec Biopharma Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
  - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
  - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
  - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
  - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
  - a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
  - b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Date: November 15, 2021

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
  - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
  - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
  - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
  - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
  - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
  - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
