UNITED STATES SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 8-K

CURRENT REPORT

Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

Date of Report (Date of earliest event reported): February 13, 2024

BENITEC BIOPHARMA INC.

(Exact name of registrant as specified in its charter)

Delaware (State or Other Jurisdiction of Incorporation) 001-39267 (Commission File Number) 84-4620206 (IRS Employer Identification No.)

3940 Trust Way, Hayward, California (Address of Principal Executive Offices) 94545 (Zip Code)

Registrant's Telephone Number, Including Area Code: (510) 780-0819

(Former Name or Former Address, if Changed Since Last Report): Not Applicable

Check the appropriate box below if the Form 8-K filing is intended to simultaneously satisfy the filing obligation of the registrant under any of the following provisions:

□ Written communications pursuant to Rule 425 under the Securities Act (17 CFR 230.425)

□ Soliciting material pursuant to Rule 14a-12 under the Exchange Act (17 CFR 240.14a-12)

D Pre-commencement communications pursuant to Rule 14d-2(b) under the Exchange Act (17 CFR 240.14d-2(b))

D Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

Securities registered pursuant to Section 12(b) of the Act:

	Trading	Name of each exchange
Title of each class	Symbol(s)	on which registered
Common Stock, par value \$0.0001	BNTC	The Nasdaq Stock Market LLC

Indicate by check mark whether the registrant is an emerging growth company as defined in Rule 405 of the Securities Act of 1933 (§230.405 of this chapter) or Rule 12b-2 of the Securities Exchange Act of 1934 (§240.12b-2 of this chapter)

Emerging Growth Company \Box

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Item 2.02 Results of Operations and Financial Condition.

On February 13, 2024, Benitec Biopharma Inc. (the "Company") issued a press release announcing the Company's financial results for its fiscal quarter ended December 31, 2023. A copy of this press release is furnished as Exhibit 99.1 to this Current Report on Form 8-K.

The information included in this Current Report on Form8-K (including Exhibit 99.1 hereto) that is furnished pursuant to this Item 2.02 shall not be deemed to be "filed" for the purposes of Section 18 of the Securities Exchange Act of 1934, as amended, or otherwise subject to the liabilities of that Section or Sections 11 and 12(a)(2) of the Securities Act of 1933, as amended. In addition, the information included in this Current Report on Form 8-K (including Exhibit 99.1 hereto) that is furnished pursuant to this Item 2.02 shall not be incorporated by reference into any filing of the Registrant, whether made before or after the date hereof, regardless of any general incorporation language in such filing, unless expressly incorporated by specific reference into such filing.

Item 9.01 Financial Statements and Exhibits.

(d) Exhibits

Exhibit No.	Description
99.1	Press Release of Benitec Biopharma Inc. dated February 13, 2024
104	Cover Page Interactive Data File (embedded within the Inline XBRL document)

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

BENITEC BIOPHARMA INC.

Benitec Biopharma Releases Second Quarter 2024 Financial Results and Provides Operational Update

-First Subject Dosed with BB-301 in Phase 1b/2a Clinical Treatment Study (NCT06185673) in November 2023-

-Data Safety Monitoring Board Review for First Subject Completed After Day 28 Study Visit-

-Second Subject Scheduled to ReceiveBB-301 in February 2024-

-23 Subjects Enrolled into the Oculopharyngeal Muscular Dystrophy Natural History Study with Multiple Subjects Eligible for entry into the Phase 1b/2a Clinical Treatment Study in 2024-

HAYWARD, Calif., February 13, 2024 — Benitec Biopharma Inc. (NASDAQ: BNTC) ("Benitec" or "Company"), a clinical-stage, gene therapyfocused, biotechnology company developing novel genetic medicines based on its proprietary "Silence and Replace" DNA-directed RNA interference ("ddRNAi") platform, today announced financial results for its second fiscal quarter ended December 31, 2023. The Company has filed its quarterly report on Form 10-Q with the U.S. Securities and Exchange Commission.

"In 2023 we formally began the journey towards clinical validation of our Silence and Replace-based approach to the management of genetically defined disorders, and our central goals remain focused on the improvement of the lives of patients suffering from Oculopharyngeal Muscular Dystrophy," said Jerel A. Banks, M.D., Ph.D., Executive Chairman and Chief Executive Officer of Benitec. "No dose-limiting toxicities have been observed in the first subject treated with BB-301, and the Data Safety Monitoring Board recommended the continuation of subject enrollment for the Phase 1b/2a Clinical Treatment Study without any modifications to the study. We are grateful to have the opportunity to continue the clinical evaluation of BB-301, and we look forward to reporting interim safety data and efficacy data in mid-2024."

Operational Updates

The key milestones related to the development of BB-301 for the treatment of Oculopharyngeal Muscular Dystrophy (OPMD)-related Dysphagia, along with other corporate updates, are outlined below:

BB-301 Clinical Development Program Overview:

- The BB-301 Phase 1b/2a clinical development program is currently underway in the United States, and the primary elements of the program are summarized below:
 - The program comprises approximately 76 weeks of follow-up which we anticipate will consist of:
 - <u>The OPMD Natural History (NH) Study:</u> 6-month pre-treatment observation periods for the evaluation of baseline disposition and natural history of OPMD-related dysphagia (swallowing impairment) in each study participant.
 - <u>Dosing with BB-301</u>: 1-day of BB-301 dosing to initiate participation in the Phase 1b/2a single-arm, open-label, sequential, dose-escalation cohort study (NCT06185673). BB-301 will be delivered directly into the pharyngeal constrictor muscles of each study subject.

- <u>Phase 1b/2a Treatment Evaluation</u>: 52-weeks of post-dosing follow-up for conclusive evaluation of the primary and secondary endpoints of the BB-301 Phase 1b/2a Clinical Treatment Study (NCT06185673), with interim safety and efficacy results expected to be available at the end of each 90-day period following the administration of BB-301.
- The OPMD NH Study will characterize the level of dysphagia borne by each OPMD subject at baseline and assess subsequent
 progression of dysphagia via the use of the following quantitative radiographic measures (i.e., videofluoroscopic swallowing studies or
 "VFSS"). The VFSS outlined below collectively provide objective assessments of global swallowing function and the function of the
 pharyngeal constrictor muscles (i.e., the muscles whose functional deterioration drives disease progression in OPMD):
 - Total Pharyngeal Residue %(C2-4)²
 - Pharyngeal Area at Maximum Constriction (PhAMPC)
 - Dynamic Imaging Grade of Swallowing Toxicity Scale (DIGEST)
 - Vallecular Residue %(C2-4)², Pyriform Sinus Residue %(C2-4)², and Other Pharyngeal Residue %(C2-4)²
 - Normalized Residue Ratio Scale (NRRSv, NRRSp)
 - Pharyngeal Construction Ratio (PCR)
- The OPMD NH Study will also employ clinical measures of global swallowing capacity and oropharyngeal dysphagia, along with two
 distinct patient-reported outcome instruments targeting the assessment of oropharyngeal dysphagia.
- Upon the achievement of 6-months of follow-up in the OPMD NH Study, participants will, potentially, be eligible for enrollment into the BB-301 Phase 1b/2a Clinical Treatment Study (NCT06185673).
- BB-301 Phase 1b/2a Clinical Treatment Study (NCT06185673):
 - This first-in-human (FIH) study is evaluating the safety and clinical activity of intramuscular doses of BB-301 administered to subjects with OPMD-related Dysphagia.
 - The primary endpoint of the FIH Study is safety.
 - Secondary endpoints are designed to determine the impact of BB-301 on swallowing efficiency, swallowing safety, and
 pharyngeal constrictor muscle function in subjects diagnosed with OPMD with dysphagia via the use of serial clinical and
 videofluoroscopic assessments. Critically, each of the clinical and videofluoroscopic assessments employed in the FIH Study
 will be equivalent to those employed for the OPMD NH Study to facilitate comparative clinical and statistical analyses for
 each study subject.

- The primary and secondary endpoints will be evaluated during each 90-day period following BB-301 intramuscular injection (Day 1).
- The natural history of dysphagia observed for each OPMD NH Study participant, as characterized by the VFSS, clinical assessments of global swallowing capacity, and patient-reported outcome measures conducted during the OPMD NH Study, will serve as the baseline for comparative assessments of safety and efficacy of BB-301 upon rollover from the OPMD NH Study onto the BB-301 Phase 1b/2a Clinical Treatment Study (NCT06185673).

Corporate Updates:

- As of January 2024, 23 subjects have been enrolled into the OPMD NH Study in the United States, and theBB-301 development program is designed to treat 21-to-30 subjects.
- In accordance with the Protocol for the BB-301 Phase 1b/2a Clinical Treatment Study (NCT06185673), a meeting of the Data Safety Monitoring Board (DSMB) was convened in January 2024 following the completion of the 28-day post BB-301 dosing visit. No doselimiting toxicities were observed in the first subject treated with BB-301, and the DSMB recommended the continuation of subject enrollment for the Phase 1b/2a Clinical Treatment Study without any modifications to the study. Following the DSMB recommendation, a second subject has been scheduled to receive BB-301 in February 2024. The next DSMB meeting is anticipated to occur in June 2024 following the 28-day post BB-301 dosing visit of the third subject in Cohort 1 of the BB-301 Phase 1b/2a Clinical Treatment Study (NCT06185673).
- Interim safety data and efficacy data are expected to become available from theBB-301 Phase 1b/2a Clinical Treatment Study (NCT06185673) in mid-2024.

Financial Highlights

Second Quarter 2024 Financial Results

Total Revenues for the quarter ended December 31, 2023, were \$0 compared to \$14,000 in licensing revenues collected for the quarter ended December 31, 2022.

Total Expenses for the quarter ended December 31, 2023, were \$6.9 million compared to \$5.6 million for the quarter ended December 31, 2022. For the quarter ended December 31, 2023, the Company incurred royalties and license fees of \$1,000 compared to \$0 for the three months ended December 31, 2022. The Company incurred \$5.1 million of research and development expenses compared to \$3.8 million for the comparable quarter ended December 31, 2022. Research and development expenses relate primarily to ongoing clinical development of BB-301 for the treatment of OPMD. General and administrative expenses were \$1.8 million compared to \$1.9 million for the quarter ended December 31, 2022.

The loss from operations for the quarter ended December 31, 2023, was \$6.9 million compared to a loss of \$5.6 million for the quarter ended December 31, 2022. Net loss attributable to shareholders for the quarter ended December 31, 2023, was \$6.8 million, or \$2.64 per basic and diluted share, compared to a net loss of \$5.4 million, or \$3.34 per basic and diluted share for the quarter ended December 31, 2022. As of December 31, 2023, the Company had \$20.4 million in cash and cash equivalents.

About BB-301

BB-301 is a novel, modified AAV9 capsid expressing a unique, single bifunctional construct promoting co-expression of both codon-optimized Poly-A Binding Protein Nuclear-1 (PABPN1) and two small inhibitory RNAs (siRNAs) against mutant PABPN1. The two siRNAs are modeled into microRNA backbones to silence expression of faulty mutant PABPN1, while allowing expression of the codon-optimized PABPN1 to replace the mutant with a functional version of the protein. We believe the silence and replace mechanism of BB-301 is uniquely positioned for the treatment of OPMD by halting mutant expression while providing a functional replacement protein.

About Benitec Biopharma Inc.

Benitec Biopharma Inc. ("Benitec" or the "Company") is a clinical-stage biotechnology company focused on the advancement of novel genetic medicines with headquarters in Hayward, California. The proprietary "Silence and Replace" DNA-directed RNA interference platform combines RNA interference, or RNAi, with gene therapy to create medicines that simultaneously facilitate sustained silencing of disease-causing genes and concomitant delivery of wildtype replacement genes following a single administration of the therapeutic construct. The Company is developing Silence and Replace-based therapeutics for chronic and life-threatening human conditions including Oculopharyngeal Muscular Dystrophy (OPMD). A comprehensive overview of the Company can be found on Benitec's website at www.benitec.com.

Forward Looking Statements

Except for the historical information set forth herein, the matters set forth in this press release include forward-looking statements, including statements regarding Benitec's plans to develop and commercialize its product candidates, the timing of the initiation and completion of pre-clinical and clinical trials, the timing of patient enrollment and dosing in clinical trials, the timing of expected regulatory filings, the clinical utility and potential attributes and benefits of ddRNAi and Benitec's product candidates, potential future out-licenses and collaborations, the intellectual property position and the ability to procure additional sources of financing, and other forward-looking statements.

These forward-looking statements are based on the Company's current expectations and subject to risks and uncertainties that may cause actual results to differ materially, including unanticipated developments in and risks related to: unanticipated delays; further research and development and the results of clinical trials possibly being unsuccessful or insufficient to meet applicable regulatory standards or warrant continued development; the ability to enroll sufficient numbers of subjects in clinical trials; determinations made by the FDA and other governmental authorities; the Company's ability to protect and enforce its patents and other intellectual property rights; the Company's dependence on its relationships with its collaboration partners and other third parties; the efficacy or safety of the Company's products and the products of the Company's collaboration partners; the acceptance of the Company's products and the products of the Company's collaboration partners; greater than expected expenses; expenses relating to litigation or strategic activities; the Company's ability to satisfy its capital needs through increasing its revenue and obtaining additional financing, given market conditions and other factors, including our capital structure; our ability to continue as a going concern; the length of time over which the Company expects its cash and cash equivalents to be sufficient to execute on its business plan; the impact of the COVID-19 pandemic, the disease caused by the SARS-CoV-2 virus and similar events, which may adversely impact the Company's business and pre-clinical and clinical trials; the impact of local, regional, and national and international economic conditions and events; and other risks detailed from time to time in the Company's reports filed with the Securities and Exchange Commission. The Company disclaims any intent or obligation to update these forward-looking statements.
